

**INDEX TO VOLUME XXXI**

**1955**

## INDEX OF SUBJECTS

- 3-Acetyl pyridine**—Pathologic effects of antimetabolites. I. Acute lesions in the hypothalamus, peripheral ganglia, and adrenal medulla caused by . . . and prevented by nicotinamide. (*Hicks: January-February*) 189
- Actinomycin D**—Carcinolytic action of antibiotics: puromycin and . . . (*Farber: May-June*) 582\*
- Adenoma**—Influence of the intensity of exposure upon the number of pulmonary adenomas initiated by a single *in vitro* exposure to ultraviolet irradiation. (*Rogers: May-June*) 582\*
- Adrenal gland**—Adrenal necrosis and thrombosis in routine necropsies. (*Plaut: January-February*) 93
- Hyperadrenocorticism: a histochemical study of surgically resected adrenal glands. (*Cohen, Chapman, and Castleman: May-June*) 570\*
- Pathologic effects of antimetabolites. I. Acute lesions in the hypothalamus, peripheral ganglia, and adrenal medulla caused by 3-acetyl pyridine and prevented by nicotinamide. (*Hicks: January-February*) 189
- Adrenal necrosis and thrombosis in routine necropsies.** (*Plaut: January-February*) 93
- Alloxan**—Cytology of islet cells in . . . diabetic rabbits. (*Bencosme: November-December*) 1149
- Alpha cells**—Effect of large doses of growth hormone on the pancreatic . . . in the rat. (*Volk and Goldner: May-June*) 569\*
- Altitude**—Susceptibility of endocardium of . . . rats to various bacteria. (*Highman and Alland: May-June*) 603\*
- Amaurotic family idiocy**—Morphologic evolution of . . . the protracted phase of the disease. (*Aronson, Volk, and Epstein: July-August*) 609
- American Association of Pathologists and Bacteriologists**—Proceedings of the . . . (May-June) 557
- Amino acid**—Histopathology of . . . deficiencies. IV. Tryptophan. (*Scott: November-December*) 1111
- Aminonucleoside**—Nephrotic syndrome induced in rats by . . . (*Craig: May-June*) 591\*
- Amyloid**—Electrophoretic analysis of . . . (*Wagner: May-June*) 573\*
- Analytical pathology.** II. Histopathologic demonstration of glomerular-localizing antibodies in experimental glomerulonephritis. (*Mellors, Arias-Stella, Siegel, and Pressman: May-June, 592\*; July-August*) 687
- Aneurysm**—Bacterial aortitis and mycotic . . . of the aorta: a report of twelve cases. (*Parkhurst and Decker: September-October*) 821
- Aneurysms of the aorta:** a report of 358 cases. (*Brindley and Stembridge: May-June*) 576\*
- Antibodies**—Analytical pathology. II. Histopathologic demonstration of glomerular-localizing . . . in experimental glomerulonephritis. (*Mellors, Arias-Stella, Siegel, and Pressman: May-June, 592\*; July-August*) 687
- Antigen**—Detection of soluble carcinoma . . . by use of the Schultz-Dale test. (*Makari: May-June*) 581\*
- Systemic effects of carbon particles coated with . . . (*Garcia-Caceres and Black-Schaffer: May-June*) 601\*
- Antimetabolites**—Pathologic effects of . . . I. Acute lesions in the hypothalamus, peripheral ganglia, and adrenal medulla caused by 3-acetyl pyridine and prevented by nicotinamide. (*Hicks: January-February*) 189
- Aorta**—Aneurysms of the . . . : a report of 358 cases. (*Brindley and Stembridge: May-June*) 576\*
- Bacterial aortitis and mycotic aneurysm of the . . . : a report of twelve cases. (*Parkhurst and Decker: September-October*) 821

\* Abstract of paper presented at the meeting of the American Association of Pathologists and Bacteriologists held at Houston, Texas, April 7, 8, and 9, 1955.

- Intimal repair of the . . . of the rabbit following experimental trauma. (*Prior and Hutter*: January-February) . . . 107
- Application of thin sections to the study of glomerular changes in glomerulonephritis. (*Grishman and Churg*: May-June) . . . 602\*
- Arteries—Experimental arteriopathy: spontaneous, epinephrine-thyroxine, and cholesterol-induced forms. (*Oester, Davis, and Friedman*: July-August) . . . 717
- Arteriosclerosis—Coronary arteriosclerotic heart disease in the younger age group; its greater frequency among an increasingly older necropsy population. (*Saphir and Ohringer*: May-June) . . . 575\*
- Rôle of pulmonary hypertension and thrombo-embolism in the production of pulmonary . . . (*O'Neal and Thomas*: May-June) . . . 578\*
- Arthropathy—Hemophilic . . . in dogs. (*Swanton and Brinkhous*: May-June) . . . 596\*
- Asbestos—Granulomatous pneumonitis caused by short-fibered . . . dust (chrysotile). (*Gross, Westrick, and McNerney*: May-June) . . . 579\*
- Aschoff body—Clinical significance of the . . . based on morphologic and histochemical observations. (*Tedeschi, Wagner, and Pani*: May-June) . . . 576\*
- Association of masculinizing ovarian hilus cell tumors, ovarian stromal hyperplasia, and lutein-like cell proliferation. (*Sternberg*: May-June) . . . 571\*
- Atherosclerosis—Experimental . . . in the rat. (*Bragdon and Mickelsen*: September-October) . . . 965
- Atomic bomb—Pathology of swine exposed to total body gamma radiation from an . . . source. (*Tullis, Lamson, and Madden*: January-February) . . . 41
- Atypical cirrhosis in the duck produced by methylcholanthrene. (*Rigdon*: May-June) . . . 461
- Bacterial aortitis and mycotic aneurysm of the aorta: a report of twelve cases. (*Parkhurst and Decker*: September-October) . . . 821
- Bacterial endocarditis produced by the tubercle bacillus. (*Russell and Berthrong*: May-June) . . . 577\*
- Basic pathologic forms of cerebral palsy. (*Towbin*: May-June) . . . 567\*
- Basophilic degeneration of the myocardium. (*Scotti*: May-June) . . . 606\*
- Blastomycetes—Morphologic variation in tissue of the organisms of the blastomycoses and of histoplasmosis. (*Moore*: November-December) . . . 1049
- Blood vessels—Experimental atherosclerosis in the rat. (*Bragdon and Mickelsen*: September-October) . . . 965
- Periarteritis nodosa limited to the pulmonary circulation. (*Braunstein*: September-October) . . . 837
- Selective renal vasospasm and ischemic renal necrosis produced experimentally with staphylococcal toxin. Observations on the pathogenesis of bilateral cortical necrosis. (*Thal*: March-April) . . . 233
- Bone marrow—A strain of metastatic epithelial cells derived from long-term tissue culture of human . . . (*Berman, Stulberg, and Ruddle*: May-June) . . . 580\*
- Bovine—Pathogenesis of . . . ocular squamous cell carcinoma: histopathologic and clinical studies. (*Wynne and Russell*: May-June) . . . 584\*
- Brain—Basic pathologic forms of cerebral palsy. (*Towbin*: May-June) . . . 567\*
- Embolization of cerebral tissue to lungs following severe head injury. (*McMillan*: May-June) . . . 579\*
- Experimental cerebral mucormycosis in diabetic rabbits. (*Bauer, Flanagan, and Sheldon*: May-June) . . . 600\*
- Histoplasmosis of the central nervous system. (*Shapiro, Lux, and Sprofskin*: March-April) . . . 319
- Lesions of the corpus callosum following blunt mechanical trauma to the head. (*Lindenberg, Fisher, Durlacher, Lovitt, and Freytag*: March-April) . . . 297

- Morphologic evolution of amaurotic family idiocy: the protracted phase of the disease. (*Aronson, Volk, and Epstein*: July-August) . . . 609
- Sarcoma arising in glioblastoma of the . . . (*Feigin and Gross*: July-August) . . . 633
- Breast**—Increased spontaneous occurrence of fibroadenomas of the . . . in the albino rat influenced by a high fat diet. (*Benson, Lev, and Grand*: May-June) . . . 583\*
- Involvement of internal mammary lymph nodes in carcinoma of the . . . : studies of the extended radical mastectomy. (*Wyatt, Sugarbaker, and Stanton*: January-February) . . . 143
- Tissue culture of human . . . carcinoma. (*Orr and McSwain*: January-February) . . . 125
- Brucella**—Immunization against . . . infection. V. Histopathologic appraisal of immunity induced in mice by a streptomycin-dependent mutant of . . . *melitensis*. (*Elberg, Steiner, and Doll*: November-December) . . . 1065
- Burns**—On the pathogenesis of death due to burning of the skin. (*Rosenthal, Finamore, Hunter, Hunter, and Roman*: May-June) . . . 568\*
- Cancer of the cervix uteri**: a review of 169 necropsied cases. (*Marcial-Rojas and Meigs*: November-December) . . . 1077
- Carcinolytic action of antibiotics**: puromycin and actinomycin D. (*Farber*: May-June) . . . 582\*
- Carcinoma**—A strain of metastatic epithelial cells derived from long-term tissue culture of human bone marrow. (*Berman, Stulberg, and Ruddle*: May-June) . . . 580\*
- Cancer of the cervix uteri: a review of 169 necropsied cases. (*Marcial-Rojas and Meigs*: November-December) . . . 1077
- Cell types and histologic patterns in . . . of the lung: observations on the significance of tumors containing more than one type of cell. (*Olcott*: November-December) . . . 975
- Detection of soluble . . . antigen by use of the Schultz-Dale test. (*Makari*: May-June) . . . 581\*
- Endometrial hyperplasia and . . . produced by estrogen. (*Meissner and Sommers*: May-June) . . . 571\*
- Involvement of internal mammary lymph nodes in . . . of the breast: studies of the extended radical mastectomy. (*Wyatt, Sugarbaker, and Stanton*: January-February) . . . 143
- Pathogenesis of bovine ocular squamous cell . . . : histopathologic and clinical studies. (*Wynne and Russell*: May-June) . . . 584\*
- Signet-ring cell . . . of the urinary bladder. (*Saphir*: March-April) . . . 223
- Three-dimensional analysis of hepatocellular . . . (*Elias and Popper*: May-June) . . . 596\*
- Tissue culture of human breast . . . (*Orr and McSwain*: January-February) . . . 125
- Cardiopneumonopexy**—Retrocardiac, intercoronary, and transpleural components in experimentally produced collateral circulation to the heart. (*Kline, Bloomer, Stern, and Liebow*: May-June) . . . 574\*
- Cell types and histologic patterns in carcinoma of the lung**: observations on the significance of tumors containing more than one type of cell. (*Olcott*: November-December) . . . 975
- Central nervous system**—Histoplasmosis of the . . . (*Shapiro, Lux, and Sproffkin*: March-April) . . . 319
- Cerebral palsy**—Basic pathologic forms of . . . (*Towbin*: May-June) . . . 567\*
- Chemotherapy**—Resistance to quadruple combination . . . in leukemia L1210 in mice. (*Nadel and Hilgar*: May-June) . . . 605\*
- Chicken**—Newcastle disease virus in cultures of chick embryo tissues: its multiplication, titration, and cytopathogenicity. (*Mason and Kaufman*: September-October) . . . 883
- Pathology of poliomyelitis in the chick embryo. (*Love and Roca-Garcia*: September-October) . . . 901

- Chlorophyllin injection in pregnant mice.** (*Glaubach and Antopol*: May-June) 601\*
- Choline**—Fat emboli in glomerular capillaries of . . . -deficient rats and of patients with diabetic glomerulosclerosis. (*Hartroft*: May-June) 381
- Chromosomes**—Further studies in quantitative cytopathology: optical measurements of the organic mass and the nucleoprotein mass of . . . in normal and neoplastic cells. (*Mellors and Ortega*: May-June) 604\*
- Chylothorax**—Intrathoracic angiomatous hyperplasia associated with chronic . . . (*Laipply and Sherrick*: May-June) 599\*
- Cirrhosis**—Atypical . . . in the duck produced by methylcholanthrene. (*Rigdon*: May-June) 461
- Coarse nodular . . . produced by ethionine. (*Popper, Clearkin, Kent, Parthasarathy, and Bruce*: May-June) 594\*
- Congenital . . . of the liver with kernicterus: report of two cases in siblings with a discussion of the relationship to so-called neonatal hepatitis and to iso-immunization disease. (*Ehrlich and Ratner*: November-December) 1013
- Histogenesis of hepatic . . . studied by the three-dimensional approach. (*Popper and Elias*: May-June) 405
- Clinical significance of the Aschoff body** based on morphologic and histochemical observations. (*Tedeschi, Wagner, and Pani*: May-June) 576\*
- Coarse nodular cirrhosis produced by ethionine.** (*Popper, Clearkin, Kent, Parthasarathy, and Bruce*: May-June) 594\*
- Collagen diseases**—Morphologic evidence of the hypersensitive pathogenesis of the lesions of experimental hypersensitivity and the . . . (*More and Movat*: May-June) 562\*
- Comparison of histochemical properties of normal and neoplastic squamous epithelium.** (*Foraker*: May-June) 581\*
- Congenital cirrhosis of the liver with kernicterus**: report of two cases in siblings with a discussion of the relationship to so-called neonatal hepatitis and to iso-immunization disease. (*Ehrlich and Ratner*: November-December) 1013
- Copper**—Histochemical demonstration of . . . in a case of hepatolenticular degeneration. (*Green*: May-June) 545
- Coronary arteriosclerotic heart disease in the younger age group**; its greater frequency among an increasingly older necropsy population. (*Saphir and Ohlinger*: May-June) 575\*
- Coronary artery disease**—Pathophysiologic evaluation in dogs of two surgical procedures used in patients with occlusive . . . (*Maniglia and Bakst*: May-June) 574\*
- Corpus callosum**—Lesions of the . . . following blunt mechanical trauma to the head. (*Lindenberg, Fisher, Durlacher, Lovitt, and Freytag*: March-April) 297
- Correlation of glomerular filtration rate with histopathologic changes in glomeruli** as seen in needle biopsy of the kidney. (*Howe and Parrish*: May-June) 603\*
- Cortical necrosis**—Selective renal vasospasm and ischemic renal necrosis produced experimentally with staphylococcal toxin. Observations on the pathogenesis of bilateral . . . (*Thal*: March-April) 233
- Cortisone**—Glomerular ultraviolet absorptions after . . . therapy, simulating diabetes mellitus. (*Sommers*: May-June) 570\*
- Influence of . . . on the development of the experimental silica granuloma in the rat. (*Clark*: May-June) 563\*
- Nodular and fatty glomerular lesions in rabbits on . . . (*Wilens and Stumpf*: March-April) 275
- Pancreatic lesions and peripancreatic fat necrosis in . . . -treated rabbits. (*Stumpf and Wilens*: May-June) 563\*
- Cortisone in experimental histoplasmosis.** (*Vogel, Michael, and Timpe*: May-June) 535
- Cretinism**—Structural features of goiters in sporadic cretins. (*Milles*: November-December) 997

- Cystic disease of the lungs:** a consequence of the healing of acute disseminated pulmonary tuberculosis. (*Berthrong and Ganem*: May-June) 601\*
- Cystinosis** (Lignac-Fanconi disease). (*Gatzimos, Schulz, and Newnum*: May-June, 567\*; September-October) 791
- Cytology of islet cells in alloxan diabetic rabbits.** (*Bencosme*: November-December) 1149
- Destructive effects of DL-ethionine** on the pancreas, stomach, and submaxillary glands. (*Loring and Hartley*: May-June) 521
- Detection of soluble carcinoma antigen** by use of the Schultz-Dale test. (*Makari*: May-June) 581\*
- Diabetes**—Cytology of islet cells in alloxan diabetic rabbits. (*Bencosme*: November-December) 1149
- Experimental cerebral mucormycosis in diabetic rabbits. (*Bauer, Flanagan, and Sheldon*: May-June) 600\*
- Diabetes mellitus**—Fat emboli in glomerular capillaries of choline-deficient rats and of patients with diabetic glomerulosclerosis. (*Hartroft*: May-June) 381
- Fat embolism in diabetic patients without physical trauma. (*Kent*: May-June) 399
- Histochemical observations on hyalinized islets of Langerhans in . . . (*Toreson and Rinehart*: May-June) 569\*
- Histopathology of experimental glomerular lesions simulating human diabetic glomerulosclerosis. (*Bloodworth and Hamwi*: January-February) 167
- Diet**—Increased spontaneous occurrence of fibroadenomas of the breast in the albino rat influenced by a high fat . . . (*Benson, Lev, and Grand*: May-June) 583\*
- Dietary deficiencies**—Histopathology of amino acid deficiencies. IV. Tryptophan. (*Scott*: November-December) 1111
- DL-ethionine**—The destructive effects of . . . on the pancreas, stomach, and submaxillary glands. (*Loring and Hartley*: May-June) 521
- Dog**—Effects of prolonged experimental hypertension in the . . . with a study of periodic renal biopsies over a seven-year period. (*Dammin, Goldman, Schroeder, and Pace*: May-June) 587\*
- Hemangiopericytoma in the . . . (*Mulligan*: July-August) 773
- Hemophilic arthropathy in dogs. (*Swanton and Brinkhous*: May-June) 596\*
- Pathophysiologic evaluation in dogs of two surgical procedures used in patients with occlusive coronary artery disease. (*Maniglia and Bakst*: May-June) 574\*
- Duck**—Atypical cirrhosis in the . . . produced by methylcholanthrene. (*Rigdon*: May-June) 461
- Neurogenic tumors in the . . . : an experimental study. (*Rigdon*: May-June) 583\*
- The pathology of infectious serositis of ducks. (*Dougherty, Saunders, and Parsons*: May-June) 475
- Effect of audiogenic stimuli on wound healing** in DBA/1 mice. (*Spain, Molomut, and Riess*: May-June) 607\*
- Effect of feeding irradiated trichinella larvae** on production of immunity to re-infection. (*Gould, Gomberg, Bethell, Villella, and Hertz*: May-June) 561\*
- Effect of hyaluronidase antagonists** on the reaction of the host to viral infection. (*Pearce*: May-June) 562\*
- Effect of large doses of growth hormone** on the pancreatic alpha cells in the rat. (*Volk and Goldner*: May-June) 560\*
- Effects of massive whole body radiation** in rats. (*Koletsky*: May-June) 568\*
- Effects of prolonged experimental hypertension** in the dog with a study of periodic renal biopsies over a seven-year period. (*Dammin, Goldman, Schroeder, and Pace*: May-June) 587\*

- Electrophoretic analysis of amyloid. (*Wagner*: May-June) . . . 573\*
- Embolization of cerebral tissue to lungs following severe head injury. (*McMillan*: May-June) . . . 579\*
- Encephalitis—Mumps . . . pathology and pathogenesis. (*Donohue, Playfair, and Whitaker*: May-June) . . . 565\*
- Endocarditis—Bacterial . . . produced by the tubercle bacillus. (*Russell and Berthrong*: May-June) . . . 577\*
- Susceptibility of endocardium of altitude rats to various bacteria. (*Highman and Alland*: May-June) . . . 603\*
- Endometrial hyperplasia and carcinoma produced by estrogen. (*Meissner and Sommers*: May-June) . . . 571\*
- Enzymes—Histochemical localization of certain oxidative . . . during the production of infarcts of the rat kidney. (*Peters and Farber*: May-June) . . . 590\*
- Histochemical localization of enzymatic activities in various portions of the mammalian nephron. (*Wachstein and Meisel*: May-June) . . . 588\*
- Improved method for the histochemical localization of oxidative . . . in the kidney with tetrazolium. (*Farber*: May-June) . . . 589\*
- Equine abortion—Susceptibility *in vitro* of adult horse tissue to . . . virus: previously undescribed lesions. (*Randall*: November-December) . . . 1165
- Estrogen—Endometrial hyperplasia and carcinoma produced by . . . (*Meissner and Sommers*: May-June) . . . 571\*
- Ethionine—Coarse nodular cirrhosis produced by . . . (*Popper, Clearkin, Kent, Parthasarathy, and Bruce*: May-June) . . . 594\*
- Experimental arteriopathy: spontaneous, epinephrine-thyroxine, and cholesterol-induced forms. (*Oester, Davis, and Friedman*: July-August) . . . 717
- Experimental aspiration pneumonia: inflammatory and reparative changes produced by intratracheal injections of autologous gastric juice and hydrochloric acid. (*Morgan*: May-June) . . . 579\*
- Experimental atherosclerosis in the rat. (*Bragdon and Mickelsen*: September-October) . . . 965
- Experimental carcinogenesis of the skin in mice: dose-response relationships. (*McTurk, Eckardt, Smith, and Cooper*: May-June) . . . 582\*
- Experimental cerebral mucormycosis in diabetic rabbits. (*Bauer, Flanagan, and Sheldon*: May-June) . . . 600\*
- Experimental monilliasis in mice. (*Adriano and Schwarz*: September-October) . . . 859
- Eye—Pathogenesis of bovine ocular squamous cell carcinoma: histopathologic and clinical studies. (*Wynne and Russell*: May-June) . . . 584\*
- Factors influencing metachromasy in solutions. (*Schoenberg and Orbison*: May-June) . . . 573\*
- Fat emboli in glomerular capillaries of choline-deficient rats and of patients with diabetic glomerulosclerosis. (*Hartroft*: May-June) . . . 381
- Fat embolism—Fat emboli in glomerular capillaries of choline-deficient rats and of patients with diabetic glomerulosclerosis. (*Hartroft*: May-June) . . . 381
- in diabetic patients without physical trauma. (*Kent*: May-June) . . . 399
- Fibrinoid—Morphologic changes in rabbits following the intravenous administration of meningococcal toxin. II. Two appropriately spaced injections; the rôle of . . . in the generalized Schwartzman reaction. (*Brunson, Thomas, and Gamble*: July-August) . . . 655
- Fibroadenoma—Increased spontaneous occurrence of fibroadenomas of the breast in the albino rat influenced by a high fat diet. (*Benson, Lev, and Grand*: May-June) . . . 583\*
- Fibrocystic disease—The pathogenesis of . . . of the pancreas. Study of the ducts by serial sections. (*Allen and Baggenstoss*: March-April) . . . 337
- Fine structure of the renal glomerulus. Histochemical and electron microscopic observations. (*Rinehart, Farquhar, and Gould*: May-June) . . . 587\*

- Focal myocytolysis of the heart.** (*Schlesinger and Reiner*: May-June) . . . 443
- Further studies in quantitative cytopathology:** optical measurements of the organic mass and the nucleoprotein mass of chromosomes in normal and neoplastic cells. (*Mellors and Ortega*: May-June) . . . 604\*
- Gamma rays**—Pathology of swine exposed to total body gamma radiation from an atomic bomb source. (*Tullis, Lamson, and Madden*: January-February) . . . 41
- Giant cells**—Neonatal jaundice with giant cell transformation of the hepatic parenchyma. (*Smelana and Johnson*: July-August) . . . 747
- Glioblastoma**—Sarcoma arising in . . . of the brain. (*Feigin and Gross*: July-August) . . . 633
- Glioma**—The nature of gliomas as revealed by animal experimentation. (*Zimmerman*: January-February) . . . I
- Glomerular lesions and the nephrotic syndrome** in rabbits given saccharated iron oxide intravenously. (*Ellis*: May-June) . . . 591\*
- Glomerular ultraviolet absorptions after cortisone therapy**, simulating diabetes mellitus. (*Sommers*: May-June) . . . 570\*
- Glomerulonephritis:** a correlation of histopathology in needle biopsies of the kidney with the clinical course. (*Howe and Parrish*: May-June) . . . 594\*
- Analytical pathology. II. Histopathologic demonstration of glomerular-localizing antibodies in experimental . . . (*Mellors, Arias-Stella, Siegel, and Pressman*: May-June, 592\*; July-August) . . . 687
- Application of thin sections to the study of glomerular changes in . . . (*Grishman and Churg*: May-June) . . . 602\*
- Glomerulosclerosis**—Fat emboli in glomerular capillaries of choline-deficient rats and of patients with diabetic . . . (*Hartroft*: May-June) . . . 381
- Histopathology of experimental glomerular lesions simulating human diabetic . . . (*Bloodworth and Hamwi*: January-February) . . . 167
- Glomerulus**—Correlation of glomerular filtration rate with histopathologic changes in glomeruli as seen in needle biopsy of the kidney. (*Howe and Parrish*: May-June) . . . 603\*
- Fine structure of the renal . . . Histochemical and electron microscopic observations. (*Rinehart, Farquhar, and Gould*: May-June) . . . 587\*
- Ischemic glomeruli and their significance for glomerular structure. (*McManus*: May-June) . . . 589\*
- Goiter**—Structural features of goiters in sporadic cretins. (*Milles*: November-December) . . . 997
- Granulomatous pneumonitis caused by short-fibered asbestos dust** (chrysotile). (*Gross, Westrick, and McNerney*: May-June) . . . 579\*
- Growth hormone**—Effect of large doses of . . . on the pancreatic alpha cells in the rat. (*Volk and Goldner*: May-June) . . . 569\*
- Guinea-pig**—Serum elpherograms in experimental nephropathies of guinea-pigs. (*Pollak and Cruz*: May-June) . . . 573\*
- Healed primary complex in histoplasmosis.** (*Straub and Schwarz*: May-June) . . . 599\*
- Heart**—Bacterial endocarditis produced by the tubercle bacillus. (*Russell and Berthrong*: May-June) . . . 577\*
- Basophilic degeneration of the myocardium. (*Scotti*: May-June) . . . 606\*
- Coronary arteriosclerotic . . . disease in the younger age group; its greater frequency among an increasingly older necropsy population. (*Saphir and Ohringer*: May-June) . . . 575\*
- Focal myocytolysis of the . . . (*Schlesinger and Reiner*: May-June) . . . 443
- Pathologic and physiologic effects of hemorrhagic shock on the . . . (*Hackel*: May-June) . . . 576\*

- Pathophysiologic evaluation in dogs of two surgical procedures used in patients with occlusive coronary artery disease. (*Maniglia and Bakst*: May-June) 574\*
- Retrocardiac, intercoronary, and transpleural components in experimentally produced collateral circulation to the . . . (*Kline, Bloomer, Stern, and Liebow*: May-June) 574\*
- Rheumatic activity in auricular appendages removed at mitral valvoplasty. (*Clark and Anderson*: September-October) 809
- Succinic dehydrogenase activity in myocardial infarction and in induced myocardial necrosis. (*Wachstein and Meisel*: March-April) 353
- Susceptibility of endocardium of altitude rats to various bacteria. (*Highman and Alland*: May-June) 603\*
- Hemangiopericytoma in the dog.** (*Mulligan*: July-August) 773
- Hemophilic arthropathy in dogs.** (*Swanton and Brinkhous*: May-June) 596\*
- Hemorrhagic fever**—Pathology of . . . A comparison of the findings — 1951 and 1952. (*Steer*: March-April) 201
- Hepatitis**—Congenital cirrhosis of the liver with kernicterus: report of two cases in siblings with a discussion of the relationship to so-called neonatal . . . and to iso-immunization disease. (*Ehrlich and Ratner*: November-December) 1013
- Hepatolenticular degeneration**—Histochemical demonstration of copper in a case of . . . (*Green*: May-June) 545
- Hepatorenal syndrome**—Pathogenetic studies in the experimental . . . using micro-angiography in the agonal phase. (*Crowson, More, and King*: May-June) 593\*
- Heterotopic ossification in intestinal neoplasms.** (*Van Patter and Whittick*: January-February) 73
- High molecular weight acidic polymers**—Morphologic changes in rabbits following the intravenous administration of meningococcal toxin. III. The effects produced by endotoxin in association with certain . . . (*Brunson, Davis, and Thomas*: July-August) 669
- Hilus cell tumors**—Association of masculinizing ovarian . . . ovarian stromal hyperplasia, and lutein-like cell proliferation. (*Sternberg*: May-June) 571\*
- Histochemical demonstration of copper in a case of hepatolenticular degeneration.** (*Green*: May-June) 545
- Histochemical localization of certain oxidative enzymes during the production of infarcts of the rat kidney.** (*Peters and Farber*: May-June) 590\*
- Histochemical localization of enzymatic activities in various portions of the mammalian nephron.** (*Wachstein and Meisel*: May-June) 588\*
- Histochemical observations on hyalinized islets of Langerhans in diabetes mellitus.** (*Toreson and Rinehart*: May-June) 569\*
- Histochemical studies on the activation of tissue alkaline phosphatase and 5-nucleotidase.** (*Freiman*: May-June) 572\*
- Histogenesis of hepatic cirrhosis studied by the three-dimensional approach.** (*Popper and Elias*: May-June) 405
- Histopathologic study of the small intestine of immature non-immunized mice infected with *Trichinella spiralis*.** (*Larsh, Jeffries, and Race*: May-June) 561\*
- Histopathology of amino acid deficiencies. IV. Tryptophan.** (*Scott*: November-December) 1111
- Histopathology of experimental glomerular lesions simulating human diabetic glomerulosclerosis.** (*Bloodworth and Hamwi*: January-February) 167
- Histoplasma capsulatum**—Morphologic variation in tissue of the organisms of the blastomycoses and of histoplasmosis. (*Moore*: November-December) 1049
- Histoplasmosis**—Cortisone in experimental . . . (*Vogel, Michael, and Timpe*: May-June) 535
- Healed primary complex in . . . (*Straub and Schwarzs*: May-June) 599\*

- Relation of splenic calcification to . . . . (Schwarz, Silverman, Straub, Levine, and Adriano: May-June) . . . . 606\*
- Histoplasmosis of the central nervous system.** (Shapiro, Lux, and Spröcklin: March-April) . . . . 319
- Hodgkin's disease**—Mortality in relation to histology in . . . . (Smelana and Cohen: May-June) . . . . 597\*
- Horse**—Susceptibility *in vitro* of adult . . . tissue to equine abortion virus: previously undescribed lesions. (Randall: November-December) . . 1165
- Human lung in leukemia:** observations on alveolar capillary leukostasis with reference to pathologic physiology. (Old, Smith, and Grampa: May-June) . . . . 605\*
- Hyaluronidase**—Effect of . . . antagonists on the reaction of the host to viral infection. (Pearce: May-June) . . . . 562\*
- Hyperadrenocorticism:** a histochemical study of surgically resected adrenal glands. (Cohen, Chapman, and Castleman: May-June) . . . . 570\*
- Hyperplasia**—Intrathoracic angiomatous . . . associated with chronic chylothorax. (Laijpy and Sherrick: May-June) . . . . 599\*
- Hypersensitivity**—Morphologic evidence of the hypersensitive pathogenesis of the lesions of experimental . . . and the collagen diseases. (More and Movat: May-June) . . . . 562\*
- Hypertension**—Effects of prolonged experimental . . . in the dog with a study of periodic renal biopsies over a seven-year period. (Dammin, Goldman, Schroeder, and Pace: May-June) . . . . 587\*
- Reduction of post-nephrectomy . . . by homogenous renal transplant mediated by means other than desalting and dehydration. (Muirhead, Stirman, and Lesch: May-June) . . . . 585\*
- Role of pulmonary . . . and thrombo-embolism in the production of pulmonary arteriosclerosis. (O'Neal and Thomas: May-June) . . . . 578\*
- Hypervitaminosis D**—Studies on . . . . (Follis: May-June) . . . . 568\*
- Hypophysis**—Possible endocrine significance of hypophyseal tumors in man. (Russfield and Reiner: May-June) . . . . 572\*
- Study of cell groups in the . . . and their relation to granular cell myoblastomas. (Davis and Bull: May-June) . . . . 566\*
- Transplantation of the parakeet pituitary tumor. (Schlumberger: May-June) . . . . 583\*
- Hypothalamus**—Pathologic effects of antimetabolites. I. Acute lesions in the . . . , peripheral ganglia, and adrenal medulla caused by 3-acetyl pyridine and prevented by nicotinamide. (Hicks: January-February) . . . . 189
- Immunization against Brucella infection.** V. Histopathologic appraisal of immunity induced in mice by a streptomycin-dependent mutant of *Brucella melitensis*. (Elberg, Steiner, and Doll: November-December) . . . . 1065
- Improved method for the histochemical localization of oxidative enzymes in the kidney with tetrazolium.** (Farber: May-June) . . . . 589\*
- Increased spontaneous occurrence of fibroadenomas of the breast** in the albino rat influenced by a high fat diet. (Benson, Lev, and Grand: May-June) . . . . 583\*
- Infants**—Pathologic findings associated with unexpected death in . . . and children. (Arey: May-June) . . . . 578\*
- Infarction**—Succinic dehydrogenase activity in myocardial . . . and in induced myocardial necrosis. (Wachstein and Meisel: March-April) . . 353
- Influence of cortisone on the development of the experimental silica granuloma in the rat.** (Clark: May-June) . . . . 563\*
- Influence of the intensity of exposure upon the number of pulmonary adenomas** initiated by a single *in vitro* exposure to ultraviolet irradiation. (Rogers: May-June) . . . . 582\*
- Injection corrosion studies of the vascular systems of normal and cirrhotic livers.** (Hales, Allan, and Hall: May-June) . . . . 595\*

- Intestine**—Heterotopic ossification in intestinal neoplasms. (*Van Patter and Whitlick*: January-February) . . . . . 73
- Histopathologic study of the small . . . of immature non-immunized mice infected with *Trichinella spiralis*. (*Larsh, Jeffries, and Race*: May-June) . . . . . 561\*
- Intimal repair of the aorta** of the rabbit following experimental trauma. (*Prior and Hutter*: January-February) . . . . . 107
- Intrathoracic angiomatous hyperplasia** associated with chronic chylothorax. (*Laipply and Sherrick*: May-June) . . . . . 599\*
- Involvement of internal mammary lymph nodes in carcinoma of the breast**: studies of the extended radical mastectomy. (*Wyatt, Sugarbaker, and Stanton*: January-February) . . . . . 143
- Irradiation**—Effect of feeding irradiated trichinella larvae on production of immunity to re-infection. (*Gould, Gomberg, Bethell, Vilella, and Hertz*: May-June) . . . . . 561\*
- Effects of massive whole body radiation in rats. (*Kolelsky*: May-June) . . . . . 568\*
- Influence of the intensity of exposure upon the number of pulmonary adenomas initiated by a single *in vitro* exposure to ultraviolet . . . . . 582\*
- Mitochondrial changes in hepatic cells of x-irradiated mice. (*MacCardle and Congdon*: July-August) . . . . . 725
- Pathology of swine exposed to total body gamma radiation from an atomic bomb source. (*Tullis, Lamson, and Madden*: January-February) . . . . . 41
- Ischemic glomeruli** and their significance for glomerular structure. (*McManus*: May-June) . . . . . 589\*
- Islet cells**—Cytology of . . . in alloxan diabetic rabbits. (*Bencosme*: November-December) . . . . . 1149
- Karyomegaly**—Systemic . . . . Case report of a heretofore undescribed disease entity. (*Moritz and Leuchtenberger*: May-June) . . . . . 564\*
- Kernicterus**—Congenital cirrhosis of the liver with . . . : report of two cases in siblings with a discussion of the relationship to so-called neonatal hepatitis and to iso-immunization disease. (*Ehrlich and Ratner*: November-December) . . . . . 1013
- Kidney**—Analytical pathology. II. Histopathologic demonstration of glomerular-localizing antibodies in experimental glomerulonephritis. (*Mellors, Arias-Stella, Siegel, and Pressman*: May-June, 592\*; July-August) . . . . . 687
- Application of thin sections to the study of glomerular changes in glomerulonephritis. (*Grishman and Churg*: May-June) . . . . . 602\*
- Correlation of glomerular filtration rate with histopathologic changes in glomeruli as seen in needle biopsy of the . . . . (*Howe and Parrish*: May-June) . . . . . 603\*
- Effects of prolonged experimental hypertension in the dog with a study of periodic renal biopsies over a seven-year period. (*Dammin, Goldman, Schroeder, and Pace*: May-June) . . . . . 587\*
- Fat emboli in glomerular capillaries of choline-deficient rats and of patients with diabetic glomerulosclerosis. (*Hartroft*: May-June) . . . . . 381
- Fine structure of the renal glomerulus. Histochemical and electron microscopic observations. (*Rinehart, Farquhar, and Gould*: May-June) . . . . . 587\*
- Glomerular lesions and the nephrotic syndrome in rabbits given saccharated iron oxide intravenously. (*Ellis*: May-June) . . . . . 591\*
- Glomerulonephritis: a correlation of histopathology in needle biopsies of the . . . with the clinical course. (*Howe and Parrish*: May-June) . . . . . 594\*
- Histochemical localization of certain oxidative enzymes during the production of infarcts of the rat . . . . . (*Peters and Farber*: May-June) . . . . . 590\*

- Histochemical localization of enzymatic activities in various portions of the mammalian nephron. (*Wachstein and Meisel*: May-June) 588\*
- Histopathology of experimental glomerular lesions simulating human diabetic glomerulosclerosis. (*Bloodworth and Hamwi*: January-February) 167
- Improved method for the histochemical localization of oxidative enzymes in the . . . with tetrazolium. (*Farber*: May-June) 589\*
- Ischemic glomeruli and their significance for glomerular structure. (*McManus*: May-June) 589\*
- Local renal Schwartzman phenomenon. (*Black-Schaffer and Garcia-Caceres*: May-June) 592\*
- Nephrotic syndrome induced in rats by aminonucleoside. (*Craig*: May-June) 591\*
- New approaches to the study of renal disorders. (*Oliver*: May-June) 592\*
- Nodular and fatty glomerular lesions in rabbits on cortisone. (*Wilens and Stumpf*: March-April) 275
- Pathogenetic studies in the experimental hepatorenal syndrome using micro-angiography in the agonal phase. (*Crowson, More, and King*: May-June) 593\*
- Prolonged functional survival of a renal homotransplant in man: morphologic observations with clinical correlation. (*Dammin, Hume, Merrill, Miller, and Thorn*: May-June) 586\*
- Reduction of post-nephrectomy hypertension by homogenous renal transplant mediated by means other than desalting and dehydration. (*Muirhead, Stirman, and Lesch*: May-June) 585\*
- Renal diseases as studied by serial . . . biopsy. (*Pirani, Muehrcke, and Kark*: May-June) 594\*
- Renal Schwartzman phenomenon in trichinosis. (*Yesner*: May-June) 592\*
- Selective renal vasospasm and ischemic renal necrosis produced experimentally with staphylococcal toxin. Observations on the pathogenesis of bilateral cortical necrosis. (*Thal*: March-April) 233
- Serum elpherograms in experimental nephropathies of guinea-pigs. (*Pollak and Cruz*: May-June) 573\*
- Symposium on new approaches to the study of renal disorders. (*Oliver*: May-June) 585\*
- The rôle of oxyhemoglobin and its derivatives in the pathogenesis of experimental hemoglobinuric nephrosis. (*Lalich*: January-February) 153
- Kwashiorkor** in a white American male. (*Diamond*: May-June) 596\*
- Leprosy**: pathologic changes observed in fifty consecutive necropsies. (*Powell and Swan*: November-December) 1131
- Leptospirosis**—Lesions of skeletal muscle in . . . Review of reports and an experimental study. (*Laurain*: May-June) 501
- Lesions of skeletal muscle in leptospirosis**. Review of reports and an experimental study. (*Laurain*: May-June) 501
- Lesions of the corpus callosum following blunt mechanical trauma** to the head. (*Lindenberg, Fisher, Durlacher, Lovitt, and Freytag*: March-April) 297
- Lesions of the intrahepatic portal radicles in Manson's schistosomiasis**. (*Lichtenberg*: May-June, 604\*; July-August) 757
- Leukemia**—A case of leukemic reticulo-endotheliosis in the rat. The relationship between this entity and Naegeli's monocytic myelogenous . . . (*Harris, Shay, and Gruenstein*: March-April) 367
- Human lung in . . . observations on alveolar capillary leukostasis with reference to pathologic physiology. (*Old, Smith, and Grampa*: May-June) 605\*
- Pattern of organ infiltrate in acute . . . of children. (*Cochran and Haut*: May-June) 597\*

- Resistance to quadruple combination chemotherapy in . . . *L1210* in mice. (*Nadel and Hilgar*: May-June) . . . 605\*
- Leukemic reticulo-endotheliosis** in the rat. The relationship between this entity and Naegeli's monocytic myelogenous leukemia. (*Harris, Shay, and Gruenstein*: March-April) . . . 367
- Liver**—Atypical cirrhosis in the duck produced by methylcholanthrene. (*Rigdon*: May-June) . . . 461
- Coarse nodular cirrhosis produced by ethionine. (*Popper, Clearkin, Kent, Parthasarathy, and Bruce*: May-June) . . . 594\*
- Congenital cirrhosis of the . . . with kernicterus: report of two cases in siblings with a discussion of the relationship to so-called neonatal hepatitis and to iso-immunization disease. (*Ehrlich and Ratner*: November-December) . . . 1013
- Histogenesis of hepatic cirrhosis studied by the three-dimensional approach. (*Popper and Elias*: May-June) . . . 405
- Injection corrosion studies of the vascular systems of normal and cirrhotic livers. (*Hales, Allan, and Hall*: May-June) . . . 595\*
- Lesions of the intrahepatic portal radicles in Manson's schistosomiasis. (*Lichtenberg*: May-June, 604\*; July-August) . . . 757
- Mitochondrial changes in hepatic cells of x-irradiated mice. (*MacCardle and Congdon*: July-August) . . . 725
- Neonatal jaundice with giant cell transformation of the hepatic parenchyma. (*Smetana and Johnson*: July-August) . . . 747
- Pathogenetic studies in the experimental hepatorenal syndrome using micro-angiography in the agonal phase. (*Crowson, More, and King*: May-June) . . . 593\*
- Three-dimensional analysis of hepatocellular carcinoma. (*Elias and Popper*: May-June) . . . 596\*
- Local renal Schwartzman phenomenon**. (*Black-Schaffer and Garcia-Caceres*: May-June) . . . 592\*
- LS tumor**, a reticulum cell sarcoma of C57BL/6 mice. (*Hathaway and Dowling*: May-June) . . . 583\*
- Lung**—Cell types and histologic patterns in carcinoma of the . . . : observations on the significance of tumors containing more than one type of cell. (*Olcott*: November-December) . . . 975
- Cystic disease of the lungs: a consequence of the healing of acute disseminated pulmonary tuberculosis. (*Berthrong and Ganem*: May-June) . . . 601\*
- Embolization of cerebral tissue to lungs following severe head injury. (*McMillan*: May-June) . . . 579\*
- Experimental aspiration pneumonia: inflammatory and reparative changes produced by intratracheal injections of autologous gastric juice and hydrochloric acid. (*Moran*: May-June) . . . 579\*
- Granulomatous pneumonitis caused by short-fibered asbestos dust (chrysotile). (*Gross, Westrick, and McNerney*: May-June) . . . 579\*
- Human . . . in leukemia: observations on alveolar capillary leukostasis with reference to pathologic physiology. (*Old, Smith, and Grampa*: May-June) . . . 605\*
- Influence of the intensity of exposure upon the number of pulmonary adenomas initiated by a single *in vitro* exposure to ultraviolet irradiation. (*Rogers*: May-June) . . . 582\*
- Periarteritis nodosa limited to the pulmonary circulation. (*Braunstein*: September-October) . . . 837
- Pulmonary mucormycosis. (*Baker and Wynn*: May-June) . . . 599\*
- Rôle of pulmonary hypertension and thrombo-embolism in the production of pulmonary arteriosclerosis. (*O'Neal and Thomas*: May-June) . . . 578\*
- Uremic pneumonitis. (*Hopps and Wissler*: March-April) . . . 261

- Luxol fast blue myelin stain**—New applications of the . . . I. A myelo-angio-cyto-architectonic method. II. A myelin-neuroglia method. III. A myelin-fat method. IV. A "myelin"-axis cylinder method. (*Margolis and Pickett: May-June*) . . . 565\*
- Lymph nodes**—Involvement of internal mammary . . . in carcinoma of the breast: studies of the extended radical mastectomy. (*Wyatt, Sugarbaker, and Stanton: January-February*) . . . 143
- Lymphoma**—On the mechanism of unexpected (so-called spontaneous) rupture of the spleen in malignant . . . (*Custer, Gunter, Warren, and Collier: May-June*) . . . 597\*
- Mechanism of unexpected (so-called spontaneous) rupture of the spleen** in malignant lymphoma. (*Custer, Gunter, Warren, and Collier: May-June*) . . . 597\*
- Melanoma**—Pigment production and biologic behavior in 380 cases of malignant . . . (*Russell, Guraieb, Wiltberger, and Clark: May-June*) . . . 585\*
- Meningococcal toxin**—Morphologic changes in rabbits following the intravenous administration of . . . I. The effects produced in young and in mature animals by a single injection. (*Brunson, Gamble, and Thomas: May-June*) . . . 489
- Morphologic changes in rabbits following the intravenous administration of . . . II. Two appropriately spaced injections; the rôle of fibrinoid in the generalized Schwartzman reaction. (*Brunson, Thomas, and Gamble: July-August*) . . . 655
- Morphologic changes in rabbits following the intravenous administration of . . . III. The effects produced by endotoxin in association with certain high molecular weight acidic polymers. (*Brunson, Davis, and Thomas: July-August*) . . . 669
- Metachromasia**—Factors influencing metachromasy in solutions. (*Schoenberg and Orbison: May-June*) . . . 573\*
- Methylcholanthrene**—Atypical cirrhosis in the duck produced by . . . (*Rigdon: May-June*) . . . 461
- Experimental carcinogenesis of the skin in mice: dose-response relationships. (*McTurk, Eckardt, Smith, and Cooper: May-June*) . . . 582\*
- Mitochondrial changes in hepatic cells of x-irradiated mice.** (*MacCardle and Congdon: July-August*) . . . 725
- Moniliasis**—Experimental . . . in mice. (*Adriano and Schwarz: September-October*) . . . 859
- Morphologic changes in rabbits following the intravenous administration of meningococcal toxin.** I. The effects produced in young and in mature animals by a single injection. (*Brunson, Gamble, and Thomas: May-June*) . . . 489
- II. Two appropriately spaced injections; the rôle of fibrinoid in the generalized Schwartzman reaction. (*Brunson, Thomas, and Gamble: July-August*) . . . 655
- III. The effects produced by endotoxin in association with certain high molecular weight acidic polymers. (*Brunson, Davis, and Thomas: July-August*) . . . 669
- Morphologic evidence of the hypersensitive pathogenesis of the lesions of experimental hypersensitivity and the collagen diseases.** (*More and Movat: May-June*) . . . 562\*
- Morphologic evolution of amaurotic family idiocy: the protracted phase of the disease.** (*Aronson, Volk, and Epstein: July-August*) . . . 609
- Morphologic variation in tissue of the organisms of the blastomycoses and of histoplasmosis.** (*Moore: November-December*) . . . 1049
- Mortality in relation to histology in Hodgkin's disease.** (*Smetana and Cohen: May-June*) . . . 597\*
- Mouse**—Chlorophyllin injection in pregnant mice. (*Glaubach and Antopol: May-June*) . . . 601\*

- Experimental carcinogenesis of the skin in mice: dose-response relationships. (*McTurk, Eckardt, Smith, and Cooper*: May-June) . . . 582\*
- Experimental moniliasis in mice. (*Adriano and Schwarz*: September-October) . . . 859
- Histopathologic study of the small intestine of immature non-immunized mice infected with *Trichinella spiralis*. (*Larsh, Jeffries, and Race*: May-June) . . . 561\*
- Immunization against *Brucella* infection. V. Histopathologic appraisal of immunity induced in mice by a streptomycin-dependent mutant of *Brucella melitensis*. (*Elberg, Steiner, and Doll*: November-December) . . . 1065
- LS tumor, a reticulum cell sarcoma of C57BL/6 mice. (*Hathaway and Dowling*: May-June) . . . 583\*
- Mitochondrial changes in hepatic cells of x-irradiated mice. (*MacCordle and Congdon*: July-August) . . . 725
- Resistance to quadruple combination chemotherapy in leukemia L1210 in mice. (*Nadel and Hilgar*: May-June) . . . 605\*
- Studies on rickettsial toxins. III. Histochemical survey of selected tissue enzymes in mice receiving murine typhus toxin. (*Wattenberg*: September-October) . . . 875
- Mucormycosis**—Experimental cerebral . . . in diabetic rabbits. (*Bauer, Flanagan, and Sheldon*: May-June) . . . 600\*
- Pulmonary . . . (*Baker and Wynn*: May-June) . . . 599\*
- Mucoviscidosis**—The pathogenesis of fibrocystic disease of the pancreas. Study of the ducts by serial sections. (*Allen and Baggenstoss*: March-April) . . . 337
- Mumps encephalitis**: pathology and pathogenesis. (*Donohue, Playfair, and Whitaker*: May-June) . . . 565\*
- Murine typhus**—Studies on rickettsial toxins. III. Histochemical survey of selected tissue enzymes in mice receiving . . . toxin. (*Wattenberg*: September-October) . . . 875
- Muscle**—Lesions of skeletal . . . in leptospirosis. Review of reports and an experimental study. (*Laurain*: May-June) . . . 501
- Mycotic aneurysm**—Bacterial aortitis and . . . of the aorta: a report of twelve cases. (*Parkhurst and Decker*: September-October) . . . 821
- Myelin**—New applications of the luxol fast blue . . . stain. I. A myelo-angio-cyto-architectonic method. II. A . . . -neuroglia method. III. A . . . -fat method. IV. A " . . . " -axis cylinder method. (*Margolis and Pickett*: May-June) . . . 565\*
- Myeloma**—Qualitative analyses of antigens of . . . serums with the agar-gel technique. (*Rice*: May-June) . . . 574\*
- Myoblastoma**—Study of cell groups in the hypophysis and their relation to granular cell myoblastomas. (*Davis and Butt*: May-June) . . . 566\*
- Myocardium**—Basophilic degeneration of the . . . (*Scotti*: May-June) . . . 606\*
- Myocytolysis**—Focal . . . of the heart. (*Schlesinger and Reiner*: May-June) . . . 443
- Nature of gliomas** as revealed by animal experimentation. (*Zimmerman*: January-February) . . . I
- Necrosis**—Adrenal . . . and thrombosis in routine necropsies. (*Plaunt*: January-February) . . . 93
- Needle biopsy**—Correlation of glomerular filtration rate with histopathologic changes in glomeruli as seen in . . . of the kidney. (*Howe and Parrish*: May-June) . . . 603\*
- Glomerulonephritis: a correlation of histopathology in needle biopsies of the kidney with the clinical course. (*Howe and Parrish*: May-June) . . . 594\*
- Renal diseases as studied by serial kidney biopsy. (*Pirani, Muehrcke, and Kark*: May-June) . . . 594\*
- Neonatal jaundice** with giant cell transformation of the hepatic parenchyma. (*Smetana and Johnson*: July-August) . . . 747

- Neoplasia**—See also specific neoplasms by name and anatomical sites.
- Association of masculinizing ovarian hilus cell tumors, ovarian stromal hyperplasia, and lutein-like cell proliferation. (*Sternberg*: May-June) . . . . . 571\*
  - Carcinolytic action of antibiotics: puromycin and actinomycin D. (*Farber*: May-June) . . . . . 582\*
  - Experimental carcinogenesis of the skin in mice: dose-response relationships. (*McTurk, Eckardt, Smith, and Cooper*: May-June) . . . . . 582\*
  - Further studies in quantitative cytopathology: optical measurements of the organic mass and the nucleoprotein mass of chromosomes in normal and neoplastic cells. (*Mellors and Ortega*: May-June) . . . . . 604\*
  - Heterotopic ossification in intestinal neoplasms. (*Van Patter and Whittick*: January-February) . . . . . 73
  - Possible endocrine significance of hypophyseal tumors in man. (*Russfield and Reiner*: May-June) . . . . . 572\*
  - Neoplasm**—Neurogenic tumors in the duck: an experimental study. (*Rigdon*: May-June) . . . . . 583\*
  - Qualitative analyses of antigens of myeloma serums with the agar-gel technique. (*Rice*: May-June) . . . . . 574\*
  - Thymoma: a review and reclassification. (*Iverson*: May-June) . . . . . 598\*
  - Transplantation of the parakeet pituitary tumor. (*Schlumberger*: May-June) . . . . . 583\*
  - Nephrectomy**—Reduction of post- . . . hypertension by homogenous renal transplant mediated by means other than desalting and dehydration. (*Muirhead, Stirman, and Lesch*: May-June) . . . . . 585\*
  - Nephrosis**—The rôle of oxyhemoglobin and its derivatives in the pathogenesis of experimental hemoglobinuric . . . . . (*Lalich*: January-February) . . . . . 153
  - Nephrotic syndrome induced in rats by aminonucleoside**. (*Craig*: May-June) . . . . . 591\*
  - Neurogenic tumors in the duck: an experimental study**. (*Rigdon*: May-June) . . . . . 583\*
  - New applications of the luxol fast blue myelin stain**. I. A myelo-angio-cyto-architectonic method. II. A myelin-neuroglia method. III. A myelin-fat method. IV. A "myelin"-axis cylinder method. (*Margolis and Pickett*: May-June) . . . . . 565\*
  - New approaches to the study of renal disorders**. (*Oliver*: May-June) . . . . . 592\*
  - Newcastle disease virus** in cultures of chick embryo tissues: its multiplication, titration, and cytopathogenicity. (*Mason and Kaufman*: September-October) . . . . . 883
  - Nicotinamide**—Pathologic effects of antimetabolites. I. Acute lesions in the hypothalamus, peripheral ganglia, and adrenal medulla caused by 3-acetyl pyridine and prevented by . . . . . (*Hicks*: January-February) . . . . . 189
  - Nodular and fatty glomerular lesions in rabbits on cortisone**. (*Wilens and Stumpf*: March-April) . . . . . 275
  - 5-Nucleotidase**—Histochemical studies on the activation of tissue alkaline phosphatase and . . . . . (*Freiman*: May-June) . . . . . 572\*
  - Ossification**—Heterotopic . . . in intestinal neoplasms. (*Van Patter and Whittick*: January-February) . . . . . 73
  - Ovary**—Association of masculinizing ovarian hilus cell tumors, ovarian stromal hyperplasia, and lutein-like cell proliferation. (*Sternberg*: May-June) . . . . . 571\*
  - Oxyhemoglobin**—The rôle of . . . and its derivatives in the pathogenesis of experimental hemoglobinuric nephrosis. (*Lalich*: January-February) . . . . . 153
  - Pancreas**—Cytology of islet cells in alloxan diabetic rabbits. (*Bencosme*: November-December) . . . . . 1149

- Effect of large doses of growth hormone on the pancreatic alpha cells in the rat. (*Volk and Goldner*: May-June) . . . . . 569\*
- Histochemical observations on hyalinized islets of Langerhans in diabetes mellitus. (*Toreson and Rinehart*: May-June) . . . . . 569\*
- Pancreatic lesions and peripancreatic fat necrosis in cortisone-treated rabbits. (*Stumpfs and Wilens*: May-June) . . . . . 563\*
- The destructive effects of DL-ethionine on the . . . , stomach, and submaxillary glands. (*Loring and Hartley*: May-June) . . . . . 521
- The pathogenesis of fibrocystic disease of the . . . . Study of the ducts by serial sections. (*Allen and Baggenstoss*: March-April) . . . . . 337
- Pancreatic fat necrosis**—Pancreatic lesions and peri. . . in cortisone-treated rabbits. (*Stumpfs and Wilens*: May-June) . . . . . 563\*
- Pancreatic lesions and peripancreatic fat necrosis in cortisone-treated rabbits.** (*Stumpfs and Wilens*: May-June) . . . . . 563\*
- Parakeet**—Transplantation of the . . . pituitary tumor. (*Schlumberger*: May-June) . . . . . 583\*
- Pathogenesis of bovine ocular squamous cell carcinoma:** histopathologic and clinical studies. (*Wynne and Russell*: May-June) . . . . . 584\*
- Pathogenesis of death due to burning of the skin.** (*Rosenthal, Finamore, Hunter, Hunter, and Roman*: May-June) . . . . . 568\*
- Pathogenesis of fibrocystic disease of the pancreas.** Study of the ducts by serial sections. (*Allen and Baggenstoss*: March-April) . . . . . 337
- Pathogenetic studies in the experimental hepatorenal syndrome** using micro-angiography in the agonal phase. (*Crowson, More, and King*: May-June) . . . . . 593\*
- Pathologic and physiologic effects of hemorrhagic shock on the heart.** (*Hackel*: May-June) . . . . . 576\*
- Pathologic effects of antimetabolites. I. Acute lesions in the hypothalamus, peripheral ganglia, and adrenal medulla caused by 3-acetyl pyridine and prevented by nicotinamide.** (*Hicks*: January-February) . . . . . 189
- Pathologic findings associated with unexpected death in infants and children.** (*Arey*: May-June) . . . . . 578\*
- Pathology of hemorrhagic fever.** A comparison of the findings — 1951 and 1952. (*Steer*: March-April) . . . . . 201
- Pathology of infectious serositis of ducks.** (*Dougherty, Saunders, and Parsons*: May-June) . . . . . 475
- Pathology of poliomyelitis in the chick embryo.** (*Love and Roca-Garcia*: September-October) . . . . . 901
- Pathology of swine exposed to total body gamma radiation from an atomic bomb source.** (*Tullis, Lamson, and Madden*: January-February) . . . . . 41
- Pathophysiologic evaluation in dogs of two surgical procedures used in patients with occlusive coronary artery disease.** (*Maniglia and Bakst*: May-June) . . . . . 574\*
- Pattern of organ infiltrate in acute leukemia of children.** (*Cochran and Haut*: May-June) . . . . . 597\*
- Periarteritis nodosa** limited to the pulmonary circulation. (*Braunstein*: September-October) . . . . . 837
- Phosphatase**—Histochemical studies on the activation of tissue alkaline . . . and 5-nucleotidase. (*Freiman*: May-June) . . . . . 572\*
- Pigment production and biologic behavior in 380 cases of malignant melanoma.** (*Russell, Guraieb, Willberger, and Clark*: May-June) . . . . . 585\*
- Pituitary body**—See hypophysis.
- Pneumonia**—Experimental aspiration . . . : inflammatory and reparative changes produced by intratracheal injections of autologous gastric juice and hydrochloric acid. (*Moran*: May-June) . . . . . 579\*
- Pneumonitis**—Granulomatous . . . caused by short-fibered asbestos dust (chrysotile). (*Gross, Westrick, and McNerney*: May-June) . . . . . 579\*
- Uremic . . . . (*Hopps and Wissler*: March-April) . . . . . 261

- Poliomyelitis**—Pathology of . . . in the chick embryo. (*Love and Roca-Garcia*: September-October) . . . 901
- Possible endocrine significance of hypophyseal tumors in man.** (*Russfeld and Reiner*: May-June) . . . 572\*
- Potassium**—Sodium and . . . content of rabbit plasma and erythrocytes in relation to age and to blood pressure. (*Waugh and Stuart*: May-June) . . . 575\*
- Proceedings**—See American Association of Pathologists and Bacteriologists.
- Prolonged functional survival of a renal homotransplant in man:** morphologic observations with clinical correlation. (*Dammin, Hume, Merrill, Miller, and Thorn*: May-June) . . . 586\*
- Pseudolymphocytic choriomeningitis**—The viral range *in vitro* of a malignant human epithelial cell (strain HeLa, Gey). III. Studies with . . . virus; general discussion. (*Scherer and Syverton*: January-February) . . . 31
- Pulmonary mucormycosis.** (*Baker and Wynn*: May-June) . . . 599\*

- Qualitative analyses of antigens of myeloma serums with the agar-gel technique.** (*Rice*: May-June) . . . 574\*
- Rabbit**—Cytology of islet cells in alloxan diabetic rabbits. (*Bencosme*: November-December) . . . 1149
- Experimental cerebral mucormycosis in diabetic rabbits. (*Bauer, Flanagan, and Sheldon*: May-June) . . . 600\*
- Glomerular lesions and the nephrotic syndrome in rabbits given saccharated iron oxide intravenously. (*Ellis*: May-June) . . . 591\*
- Intimal repair of the aorta of the . . . following experimental trauma. (*Prior and Hutter*: January-February) . . . 107
- Morphologic changes in rabbits following the intravenous administration of meningococcal toxin. I. The effects produced in young and in mature animals by a single injection. (*Brunson, Gamble, and Thomas*: May-June) . . . 489
- Morphologic changes in rabbits following the intravenous administration of meningococcal toxin. II. Two appropriately spaced injections; the rôle of fibrinoid in the generalized Shwartzman reaction. (*Brunson, Thomas, and Gamble*: July-August) . . . 655
- Morphologic changes in rabbits following the intravenous administration of meningococcal toxin. III. The effects produced by endotoxin in association with certain high molecular weight acidic polymers. (*Brunson, Davis, and Thomas*: July-August) . . . 669
- Nodular and fatty glomerular lesions in rabbits on cortisone. (*Wilens and Stumpf*: March-April) . . . 275
- Pancreatic lesions and peripancreatic fat necrosis in cortisone-treated rabbits. (*Stumpf and Wilens*: May-June) . . . 563\*
- Sodium and potassium content of . . . plasma and erythrocytes in relation to age and to blood pressure. (*Waugh and Stuart*: May-June) . . . 575\*
- Rat**—A case of leukemic reticulo-endotheliosis in the . . . The relationship between this entity and Naegeli's monocytic myelogenous leukemia. (*Harris, Shay, and Gruenstein*: March-April) . . . 367
- Effect of large doses of growth hormone on the pancreatic alpha cells in the . . . (*Volk and Goldner*: May-June) . . . 569\*
- Effects of massive whole body radiation in rats. (*Koletsky*: May-June) . . . 568\*
- Experimental atherosclerosis in the . . . (*Bragdon and Mickelsen*: September-October) . . . 965
- Fat emboli in glomerular capillaries of choline-deficient rats and of patients with diabetic glomerulosclerosis. (*Hartroft*: May-June) . . . 381

- Histochemical localization of certain oxidative enzymes during the production of infarcts of the . . . kidney. (*Peters and Farber*: May-June) 590\*
- Increased spontaneous occurrence of fibroadenomas of the breast in the albino . . . influenced by a high fat diet. (*Benson, Lev, and Grand*: May-June) 583\*
- Influence of cortisone on the development of the experimental silica granuloma in the . . . (*Clark*: May-June) 563\*
- Nephrotic syndrome induced in rats by aminonucleoside. (*Craig*: May-June) 591\*
- Susceptibility of endocardium of altitude rats to various bacteria. (*Highman and Alland*: May-June) 603\*
- Reduction of post-nephrectomy hypertension by homogenous renal transplant** mediated by means other than desalting and dehydration. (*Muirhead, Stirman, and Lesch*: May-June) 585\*
- Relapsing fever in Korea**: a clinicopathologic study of eleven fatal cases with special attention to association with *Salmonella* infections. (*Anderson and Zimmerman*: November-December) 1083
- Relation of splenic calcification to histoplasmosis**. (*Schwarz, Silverman, Straub, Levine, and Adriano*: May-June) 606\*
- Renal diseases as studied by serial kidney biopsy**. (*Pirani, Muehrcke, and Kark*: May-June) 594\*
- Renal Schwartzman phenomenon in trichinosis**. (*Yesner*: May-June) 592\*
- Resistance to quadruple combination chemotherapy in leukemia L1210 in mice**. (*Nadel and Hilgar*: May-June) 605\*
- Reticulo-endotheliosis**—A case of leukemic . . . in the rat. The relationship between this entity and Naegeli's monocytic myelogenous leukemia. (*Harris, Shay, and Gruenstein*: March-April) 367
- Retrocardiac, intercoronary, and transpleural components in experimentally produced collateral circulation to the heart**. (*Kline, Bloomer, Stern, and Liebow*: May-June) 574\*
- Rheumatic activity in auricular appendages removed at mitral valvoplasty**. (*Clark and Anderson*: September-October) 809
- Rheumatic carditis**—Clinical significance of the Aschoff body based on morphologic and histochemical observations. (*Tedeschi, Wagner, and Pani*: May-June) 576\*
- Rickettsia**—Studies on rickettsial toxins. III. Histochemical survey of selected tissue enzymes in mice receiving murine typhus toxin. (*Wattenberg*: September-October) 875
- Rôle of oxyhemoglobin and its derivatives in the pathogenesis of experimental hemoglobinuric nephrosis**. (*Lalich*: January-February) 153
- Rôle of pulmonary hypertension and thrombo-embolism in the production of pulmonary arteriosclerosis**. (*O'Neal and Thomas*: May-June) 578\*
- Saccharated iron oxide**—Glomerular lesions and the nephrotic syndrome in rabbits given . . . intravenously. (*Ellis*: May-June) 591\*
- Salmonella**—Relapsing fever in Korea: a clinicopathologic study of eleven fatal cases with special attention to association with . . . infections. (*Anderson and Zimmerman*: November-December) 1083
- Sarcoma**—LS tumor, a reticulum cell . . . of C57BL/6 mice. (*Hathaway and Dowling*: May-June) 583\*
- Sarcoma arising in glioblastoma of the brain**. (*Feigin and Gross*: July-August) 633
- Schistosomiasis**—Lesions of the intrahepatic portal radicles in Manson's . . . (*Lichtenberg*: May-June, 604\*; July-August) 757
- Schultz-Dale test**—Detection of soluble carcinoma antigen by use of the . . . (*Makari*: May-June) 581\*
- Selective renal vasospasm and ischemic renal necrosis** produced experimentally with staphylococcal toxin. Observations on the pathogenesis of bilateral cortical necrosis. (*Thal*: March-April) 233

- Serositis**—The pathology of infectious . . . of ducks. (*Dougherty, Saunders, and Parsons*: May-June) 475
- Serum elpherograms in experimental nephropathies of guinea-pigs.** (*Pollak and Cruz*: May-June) 573\*
- Shock**—Pathologic and physiologic effects of hemorrhagic . . . on the heart. (*Hackel*: May-June) 576\*
- Shwartzman phenomenon**—Local renal . . . . (*Black-Schaffer and Garcia-Caceres*: May-June) 592\*
- Morphologic changes in rabbits following the intravenous administration of meningococcal toxin. II. Two appropriately spaced injections; the rôle of fibrinoid in the generalized Shwartzman reaction. (*Brunson, Thomas, and Gamble*: July-August) 655
- Renal . . . in trichinosis. (*Yesner*: May-June) 592\*
- Signet-ring cell carcinoma of the urinary bladder.** (*Saphir*: March-April) 223
- Silicosis**—Influence of cortisone on the development of the experimental silica granuloma in the rat. (*Clark*: May-June) 563\*
- Skin**—On the pathogenesis of death due to burning of the . . . . (*Rosenthal, Finamore, Hunter, Hunter, and Roman*: May-June) 568\*
- Sodium and potassium content of rabbit plasma and erythrocytes in relation to age and to blood pressure.** (*Waugh and Stuart*: May-June) 575\*
- Sound**—Effect of audiogenic stimuli on wound healing in DBA/1 mice. (*Spain, Molomut, and Riess*: May-June) 607\*
- Spleen**—On the mechanism of unexpected (so-called spontaneous) rupture of the . . . in malignant lymphoma. (*Custer, Gunter, Warren, and Collier*: May-June) 597\*
- Relation of splenic calcification to histoplasmosis. (*Schwarz, Silverman, Straub, Levine, and Adriano*: May-June) 606\*
- Squamous epithelium**—Comparison of histochemical properties of normal and neoplastic . . . . (*Foraker*: May-June) 581\*
- Staphylococcal toxin**—Selective renal vasospasm and ischemic renal necrosis produced experimentally with . . . . Observations on the pathogenesis of bilateral cortical necrosis. (*Thal*: March-April) 233
- Stomach**—The destructive effects of DL-ethionine on the pancreas, . . . , and submaxillary glands. (*Loring and Hartley*: May-June) 521
- Strain of metastatic epithelial cells derived from long-term tissue culture of human bone marrow.** (*Berman, Stulberg, and Ruddie*: May-June) 580\*
- Structural features of goiters in sporadic cretins.** (*Milles*: November-December) 997
- Studies on hypervitaminosis D.** (*Follis*: May-June) 568\*
- Studies on rickettsial toxins. III.** Histochemical survey of selected tissue enzymes in mice receiving murine typhus toxin. (*Wattenberg*: September-October) 875
- Studies on *Trichinella spiralis*.** I to V. (*Gould, Gomberg, Bethell, Vilella, and Hertz*: September-October) 933
- Study of cell groups in the hypophysis and their relation to granular cell myoblastomas.** (*Davis and Butt*: May-June) 566\*
- Submaxillary glands**—The destructive effects of DL-ethionine on the pancreas, stomach, and . . . . (*Loring and Hartley*: May-June) 521
- Succinic dehydrogenase activity in myocardial infarction and in induced myocardial necrosis.** (*Wachstein and Meisel*: March-April) 353
- Susceptibility in vitro of adult horse tissue to equine abortion virus:** previously undescribed lesions. (*Randall*: November-December) 1165
- Susceptibility of endocardium of altitude rats to various bacteria.** (*Highman and Alland*: May-June) 603\*
- Swine**—Pathology of . . . exposed to total body gamma radiation from an atomic bomb source. (*Tullis, Lamson, and Madden*: January-February) 41
- Symposium on new approaches to the study of renal disorders.** (*Oliver*: May-June) 585\*

- Systemic effects of carbon particles coated with antigen.** (*Garcia-Caceres and Black-Schaffer*: May-June) . . . . . 601\*
- Systemic karyomegaly.** Case report of a heretofore undescribed disease entity. (*Moritz and Leuchtenberger*: May-June) . . . . . 564\*
- Thermal injury**—On the pathogenesis of death due to burning of the skin. (*Rosenthal, Finamore, Hunter, Hunter, and Roman*: May-June) . . . . . 568\*
- Three-dimensional analysis of hepatocellular carcinoma.** (*Elias and Popper*: May-June) . . . . . 596\*
- Thrombosis**—Adrenal necrosis and . . . in routine necropsies. (*Plant*: January-February) . . . . . 93
- Thymoma**: a review and reclassification. (*Iverson*: May-June) . . . . . 598\*
- Thyroid gland**—Structural features of goiters in sporadic cretins. (*Milles*: November-December) . . . . . 997
- Tissue culture of human breast carcinoma.** (*Orr and McSwain*: January-February) . . . . . 125
- Toxin**—Studies on rickettsial toxins. III. Histochemical survey of selected tissue enzymes in mice receiving murine typhus . . . . . 875  
(*Wattenberg*: September-October)
- Transplantation**—Prolonged functional survival of a renal homotransplant in man: morphologic observations with clinical correlation. (*Dammin, Hume, Merrill, Miller, and Thorn*: May-June) . . . . . 586\*
- Reduction of post-nephrectomy hypertension by homogenous renal transplant mediated by means other than desalting and dehydration. (*Muirhead, Stirman, and Lesch*: May-June) . . . . . 585\*
- Transplantation of the parakeet pituitary tumor.** (*Schlumberger*: May-June) . . . . . 583\*
- Trauma**—Intimal repair of the aorta of the rabbit following experimental . . . . . 107  
(*Prior and Hutter*: January-February)
- Lesions of the corpus callosum following blunt mechanical . . . to the head. (*Lindenberg, Fisher, Durlacher, Lovitt, and Freytag*: March-April) . . . . . 297
- Trichinella spiralis**—Effect of feeding irradiated trichinella larvae on production of immunity to re-infection. (*Gould, Gomberg, Bethell, Villella, and Hertz*: May-June) . . . . . 561\*
- Histopathologic study of the small intestine of immature non-immunized mice infected with . . . . . (*Larsh, Jeffries, and Race*: May-June) . . . . . 561\*
- Studies on . . . . I to V. (*Gould, Gomberg, Bethell, Villella, and Hertz*: September-October) . . . . . 933
- Trichinosis**—Renal Shwartzman phenomenon in . . . . . (*Yesner*: May-June) . . . . . 592\*
- Tryptophan**—Histopathology of amino acid deficiencies. IV. . . . . IIII  
(*Scott*: November-December)
- Tubercle bacillus**—Bacterial endocarditis produced by the . . . . . (*Russell and Berthrong*: May-June) . . . . . 577\*
- Tuberculosis**—Cystic disease of the lungs: a consequence of the healing of acute disseminated pulmonary . . . . . (*Berthrong and Ganem*: May-June) . . . . . 601\*
- Ultraviolet absorption**—Glomerular ultraviolet absorptions after cortisone therapy, simulating diabetes mellitus. (*Sommers*: May-June) . . . . . 570\*
- Unexpected death**—Pathologic findings associated with . . . in infants and children. (*Arey*: May-June) . . . . . 578\*
- Uremic pneumonitis.** (*Hopps and Wissler*: March-April) . . . . . 261
- Urinary bladder**—Signet-ring cell carcinoma of the . . . . . (*Saphir*: March-April) . . . . . 223
- Uterus**—Cancer of the cervix uteri: a review of 169 necropsied cases. (*Marcial-Rojas and Meigs*: November-December) . . . . . 1077

- Viral range in vitro of a malignant human epithelial cell (strain HeLa, Gey).** III. Studies with pseudolymphocytic choriomeningitis virus; general discussion. (*Scherer and Syverton*: January-February) . . . 31
- Virus**—Effect of hyaluronidase antagonists on the reaction of the host to viral infection. (*Pearce*: May-June) . . . 562\*
- Newcastle disease . . . in cultures of chick embryo tissues: its multiplication, titration, and cytopathogenicity. (*Mason and Kaufman*: September-October) . . . 883
- Pathology of poliomyelitis in the chick embryo. (*Love and Roca-Garcia*: September-October) . . . 901
- Susceptibility *in vitro* of adult horse tissue to equine abortion . . . : previously undescribed lesions. (*Randall*: November-December) . . . 1165
- The viral range *in vitro* of a malignant human epithelial cell (strain HeLa, Gey). III. Studies with pseudolymphocytic choriomeningitis . . . ; general discussion. (*Scherer and Syverton*: January-February) . . . 31
- Vitamin D**—Studies on hypervitaminosis D. (*Follis*: May-June) . . . 568\*
- Wilson's disease**—Histochemical demonstration of copper in a case of hepatolenticular degeneration. (*Green*: May-June) . . . 545
- Wound healing**—Effect of audiogenic stimuli on . . . in DBA/1 mice. (*Spain, Molomut, and Riess*: May-June) . . . 607\*
